

2N

Induction Loop

The induction loop transfers audio from the 2N IP Force 2.0 intercom to hearing aid users.

This accessory is needed to allow the intercom to meet the IEC 60118-4 standard requirements, which are often required in public projects.

It also allows for more inclusive communication and helps meet the standards of the European Accessibility Act.

The induction loop is installed inside the intercom, which protects it from rain and vandalism and ensures reliable, inclusive communication.

Variants

Technical Parameters

Mechanical properties

Working temperature	-22 °F – +131 °F
Storing temperature	-40 °F – +158 °F
Working relative humidity	10 % – 95 % (non-condensing)

Warranty

5-year warranty. See:
