

STI Euro Stopper® Multi Kit

Optional Integral
Sounder

Break Seal Facility
Left or Right
Installation Option

Optional Wireless

PRODUCT OVERVIEW

Protective cover helps prevent malicious or accidental false fire alarms. This newly styled protective cover enhances the Stopper® range, which has helped prevent false fire alarms around the world for decades, without restricting legitimate operation of devices such as fire alarm break glass call points. Sleeker and less intrusive in its design, this compact device incorporates the existing features of the Stopper but is now visibly smaller. The new hinge arrangement increases the durability, strength and quality of this essential protective cover. Ideal for schools, colleges, hospitals, nursing homes, hotels and all public buildings where there is a history or a threat of false fire alarms.

HOW IT WORKS

The Euro Stopper consists of a clear, tamperproof, tough polycarbonate cover and frame that retrofits over the break glass call point. When lifted to gain access to the break glass, its optional battery powered integral sounder emits an ear piercing 96 dB (at 3'). Immediate attention is drawn to the area and the prankster will either run or be caught.

ABOUT THE *Glow Guide* & MULTI KIT

The Glow Guide is a unique material embedded in the perimeter of the frame and illuminates in the dark. It creates a radiant glow around the manual call point making it easier to locate in unlit areas. The Multi Kit comes with one Euro Stopper frame embedded with the Glow Guide, 2 colored housing shells (red & green), 1 break seal and 2 label sheets in 13 languages. Available with or without sounder. If you require the product with sounder & relay, sounder & wireless or with sounder, wireless & relay it is recommended to purchase the non-sounder version and then purchase the appropriate accessory to suit your needs.

Key features

General Information

- Protective cover helps prevent malicious or accidental false fire alarms.
- Three year guarantee against breakage of polycarbonate in normal use (one year on electromechanical and electronic components).

Design

- Prevents false alarms, without hindering legitimate operation of a manual call point.
- Glows in the dark.

Construction

- Tough polycarbonate housing.

Installation

- Retrofit over existing device.
- Can accommodate flush or surface mount applications.
- Typical working properties of polycarbonate are -40°C to 121°C (-40° to 250°F).

Electronics

- Available with or without a 96 dB integral sounder, powered by a 3V lithium battery.
- Optional 12-24 VDC powered units.

Options

- One breakseal is supplied with each model. (additional sold separately).
- Other colors available - non Multi Kit versions only.

Remote Wireless Monitoring of Call Points

- You can now be alerted to any vandalism or authorized use of a manual call point in the event of an emergency. Upon activation, the Euro Stopper (when fitted with an optional transmitter and sounder) will emit a localized alarm as well as triggering a receiver providing a visual and audible indication, remotely.

STI Euro Stopper® Multi Kit

MODELS AVAILABLE

- STI-15010ML** Euro Stopper Multi Kit, flush mount without integral sounder
